

PUBLIC NOTICE

Lake Templene

Treatments will start no earlier than the week of May 8th

PLEASE TAKE THE TIME TO READ THIS NOTICE; IT IS FOR YOUR INFORMATION!!!

The Lake Templene HOA is planning to have the waters in Lake Templene chemically treated for control of lake weeds and/or algae. This notice is being circulated at least 7 days in advance of the initial treatment in accordance with the Department of Environmental Quality procedures. A permit for the treatment has either been secured, or will be secured, from the DEQ before the work is begun.

These products will be applied by hand-gun, granular spreader and/or sub-surface injection. We treat each lake accordingly to a schedule or season plan worked out with the lake association, lake board or residents on the lake. **Due to the uncertainty of weather, please watch your shoreline for the posting of the 11X14 inch, yellow signs.** The signs will indicate the date of the treatment, the products used, and the restrictions as to the use of the water for swimming, watering lawns, and household use of these waters. One or more treatments involving water restrictive products may be applied. There may be spot treating of vegetation involving water restrictive products throughout the summer. **This will be the only notification you will receive.**

Please also be aware that only products that have been approved by the State of Michigan and the EPA are being used. We anticipate using one or more of the products listed below. Again, these restrictions with their respective products will be found on the signs posted on the day of treatment.

When more than one chemical is used the strictest, longest limits will be posted. These restrictions are designed to allow the safe use of these products. Please do not encourage anyone to use the water in violation of restrictions. If you have any questions, please contact:
